immunoreactive cell bodies and fibres in the brainstem of the cat, 93
Bronchi *see* Airway

C

Caerulein, subdiaphragmatic vagotomy does not prevent anti-exploratory effect in elevated plus-maze of, 39
Calcitonin and CGRP gene expression in human nervous and medullary thyroid carcinoma tissues, 215
Calcitonin gene-related peptide (CGRP)
behavioural impairment induced by CGRP antiserum in passive avoidance reflex in rats, 233
calcitonin and CGRP gene expression in human nervous and medullary thyroid carcinoma tissues, 215
capsaicin-like effect of resiniferatoxin on CGRP-like immunoreactivity in the rat stomach, 29
characterization of CGRP receptors in various regions of rat brain, 313
in vitro expression of CGRP in human endothelial cells transfected with plasmid and retroviral vectors, 167
mode of action of CGRP in trout gill membranes: evidence for a GTP coupling process, 267
nitroglycerin substitutes for endothelium-derived nitric oxide in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
N_{ω}-nitro-L-arginine inhibits vasodilations and elevations of both cyclic AMP and cyclic GMP levels induced by CGRP in rat aorta, 123
Calmodulin: neuropeptide Y enhances LHRH binding to rat gonadotrophs in primary culture, 87
Cancer
calcitonin and CGRP gene expression in human nervous and medullary thyroid carcinoma tissues, 215
effect of the slow-release formation of somatuline (BIM 23014) on oestrogen-induced hyperprolactinaemia and lactotroph hyperplasia in the female rat, 399
immunoassays for measurement of chromogranin A and pancreastatin-like immunoreactivity in humans: correspondence in patients with neuroendocrine neoplasia, 201
Capsaicin-like effect of resiniferatoxin in the rat stomach, 29
Carrageenin-induced oedema formation in guinea-pig skin, effect of a neurokinin-1 receptor antagonist on, 405
Carcinoid disease: immunoassays for measurement of chromogranin A and pancreastatin-like immunoreactivity in humans and correspondence in patients with neuroendocrine neoplasia, 201
Cell death: vasoactive intestinal peptide suppresses neuronal cell death induced by nerve growth factor deprivation in rat sympathetic ganglion cells in vitro, 103
Cerebellum: characterization of calcitonin gene-related peptide receptors in various regions of rat brain, 313
Cholecystokinin (CCK)
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
central administration of Tyr-MIF-1 stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and CCK receptors, 77
cholecystokinin (CCK-8S) prolongs 'unsaturated' θ-pulse induced long-term potentiation in rat hippocampal CA1 in vitro, 421
cholecystokinin receptor binding in morphine analgesia: tolerance withdrawal and abstinence, 379
comparative ^{3}H-CCK-8S binding studies on CCK_B-type receptors in guinea-pig cortex and continuous cell lines, 429
effects of sequential removal of rats from a group cage and of individual housing of rats on substance P CCK and somatostatin levels in the periaqueductal grey and limbic regions, 253
inhibition of pro-CCK sulfation by treatment with sodium chlorate alters its processing and decreases cellular content and secretion of CCK, 195
investigation into the discriminative stimulus and reinforcing properties of the CCK_B-receptor antagonist L-365,260, 343
subdiaphragmatic vagotomy does not prevent the anti-exploratory effect of CCK agonist caerulein in the elevated plus-maze, 39
Chromogranin A (CgA): immunoassays for measurement of CgA and pancreastatin-like immunoreactivity in humans: correspondence in patients with neuroendocrine neoplasia, 201
Cingulate cortex, regulation of feeding by multiple opioid receptors in: follow-up to an in vivo autoradiographic study, 207
Clonidine: and inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles, 11
Colon
effect of atrial natriuretic peptides on ion transport by muscle-stripped and full-thickness preparations of rat colon, 237
neuropeptide Y enhances proliferation of human colonic lamina propria lymphocytes, 289
Cortex
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
characterization of calcitonin gene-related peptide receptors in various regions of rat brain, 313
cholecystokinin receptor binding in morphine analgesia: tolerance withdrawal and abstinence, 379
comparative ^{3}H-CCK-8S binding studies on CCK_B-type receptors in guinea-pig cortex and continuous cell lines, 429
role of α-1 adrenergic receptors in the stimulating effect of neuropeptide Y on rat behavioural activity, 225
Corticosteroids
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
effects of neuromedin U on the rat hypothalamo-pituitary-adrenal axis: evidence of a direct effect of NMU-8 on the adrenal gland, 47
role of central corticoliberin in the ether stress-induced secretion of neurohypophyseal hormones and corticosterone in the rat, 33
role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland in situ, 391
Corticotropin-releasing factor (CRF)
depolarization-induced release of CRF in primary neuronal cultures of amygdala, 113
role of central corticoliberin in the ether stress-induced secretion of neurohypophyseal hormones and corticosterone in the rat, 33
Cyclic AMP and cyclic GMP
nitroglycerin substitutes for endothelium-derived nitric oxide

in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
N_{ω}-nitro-L-arginine inhibits vasodilations and elevations of both cyclic AMP and cyclic GMP levels in rat aorta induced by calcitonin gene-related peptide, 123
Cyclo(His-Pro) is secreted in a pulsatile fashion in fasting humans, 273
Cyproheptadine: effect of tryptophan and other serotonergic agents on brain CCK-8 concentrations, 59

D

Deltorphins: binding characteristics of the novel highly selective delta agonist [^{3}]Ile^{5,6}Deltorphin II, 261
Dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
Dopamine: central administration of Tyr-MIF-1 stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and cholecystokinin receptors, 77
Duodenum *see* Gastrointestinal tract
Dynorphin
brain dynorphin concentrations: effect of tryptophan and other serotonergic agents, 59
dynorphin-A and vasopressin release in the rat, structure-activity study of, 371
[^{3}H]dynorphin$_{1-8}$ binding sites in frog brain membranes, 359

E

Electroacupuncture tolerance by different frequencies, effect on the opioid inhibition to cardiovascular activity in the spinal cord of rats of, 221
Endopeptidase 22.19, structural requirements of bioactive peptides for interaction with, 281
Endorphin(s)
differential effects of intrathecally injected galanin on antinociception induced by β-endorphin and morphine administered intracerebroventricularly in mice, 297
inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
Endothelin
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
identification of a novel endothelin receptor in *Xenopus laevis* liver, 181
Endothelium
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
in vitro expression of CGRP in human endothelial cells transfected with plasmid and retroviral vectors, 167
nitroglycerin substitutes for endothelium-derived nitric oxide in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
N_{ω}-nitro-L-arginine inhibits vasodilations and elevations of both cyclic AMP and cyclic GMP levels in rat aorta induced by calcitonin gene-related peptide, 123
substance P induces biphasic endothelium-dependent relaxations in pig and rabbit carotid arteries, 329
Endothelium-derived relaxing factor (EDRF) *see* Nitric oxide
Enkephalin(s)
effect of electroacupuncture tolerance by different frequencies on the opioid inhibition to cardiovascular activity in the spinal cord of rats, 221
effects of μ- δ- and κ-agonists on isolated right atria of the rat, 365
role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland in situ, 391

F

Feeding
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
cyclo(His-Pro) is secreted in a pulsatile fashion in fasting humans, 273
regulation of feeding by multiple opioid receptors in cingulate cortex: follow-up to an in vivo autoradiographic study, 207
Fish: mode of action of calcitonin gene-related peptide in trout gill membranes and evidence for a GTP coupling process, 267

G

Galanin
differential effects of intrathecally injected galanin on antinociception induced by β-endorphin and morphine administered intracerebroventricularly in mice, 297
effect on release of neurotransmitter amino acids from rat striatum of, 65
modulation of neurotransmission in guinea-pig airways by galanin and the effect of a new antagonist galantide, 245
Gastrin-releasing peptide (GRP): distribution of GRP/bombesin-like immunoreactive cell bodies and fibres in the brainstem of the cat, 93
Gastrointestinal tract
capsaicin-like effect of resiniferatoxin in the rat stomach, 29
central administration of Tyr-MIF-1 stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and cholecystokinin receptors, 77
cholecystokinin receptors: subdiaphragmatic vagotomy does not prevent the anti-exploratory effect of caerulein in the elevated plus-maze, 39
cyclo(His-Pro) is secreted in a pulsatile fashion in fasting humans, 273
effect of atrial natriuretic peptides on ion transport by muscle-stripped and full-thickness preparations of rat colon, 237
neuropeptide Y enhances proliferation of human colonic lamina propria lymphocytes, 289
Gene transfer: in vitro expression of calcitonin gene-related peptide in human endothelial cells transfected with plasmid and retroviral vectors, 167
Glucocorticoids
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland in situ, 391

Glutamate: effect of neuropeptides on release of neurotransmitter amino acids from rat striatum, 65
G-proteins
mode of action of calcitonin gene-related peptide in trout gill membranes: evidence for a GTP coupling process, 267
neuropeptide Y enhances LHRH binding to rat gonadotrophs in primary culture, 87

H

Heart
effect of central angiotensin II and angiotensin III on baroreflex regulation, 175
effect of electroacupuncture tolerance by different frequencies on the opioid inhibition to cardiovascular activity in the spinal cord of rats, 221
effects of μ- δ- and κ-agonists on isolated right atria of the rat, 365
inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
Hippocampus
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
characterization of calcitonin gene-related peptide receptors in various regions of rat brain, 313
cholecystokinin prolongs 'unsaturated' θ-pulse induced long-term potentiation in rat hippocampal CA1, 421
effects of sequential removal of rats from a group cage and of individual housing of rats on substance P cholecystokinin and somatostatin levels in the periaqueductal grey and limbic regions, 253
Histamine: effect of a neurokinin-1 receptor antagonist on allergen-induced oedema formation in guinea-pig skin, 405
Histidyl-proline diketopiperazine *see* Cyclo(His-Pro)
5-Hydroxytryptamine (serotonin): effect of tryptophan and other serotonergic agents on brain CCK-8 concentrations, 59
Hypothalamus
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
characterization of calcitonin gene-related peptide receptors in various regions of rat brain, 313

I

Imipramine: effect of tryptophan and other serotonergic agents on brain CCK-8 concentrations, 59
Immune system: neuropeptide Y enhances proliferation of human colonic lamina propria lymphocytes, 289
Inflammation: effect of a neurokinin-1 receptor antagonist on oedema formation induced by tachykinins carrageenin and an allergic response in guinea-pig skin, 405
Inositol phosphates
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
α-trinositol blocks neuropeptide Y-induced inositol phosphate formation in cerebral vessels, 305
Ion transport by muscle-stripped and full-thickness preparations of rat colon, effect of atrial natriuretic peptides on, 237

L

Liver: identification of a novel endothelin receptor in *Xenopus laevis*, 181
Locomotor activity
role of α-1 adrenergic receptors in the stimulating effect of neuropeptide Y on rat behavioural activity, 225
stimulation of locomotion in neonate rats by thyrotropin-releasing hormone analogue CG3703, 71
subdiaphragmatic vagotomy does not prevent the anti-exploratory effect of caerulein in the elevated plus-maze, 39
Long-term potentiation in rat hippocampal CA1 in vitro is prolonged by cholecystokinin CCK-8S, 421
Luteinizing hormone-releasing hormone (LHRH) binding to rat gonadotrophs in primary culture is enhanced by neuropeptide Y, 87
Lymphocytes: neuropeptide Y enhances proliferation of human colonic lamina propria lymphocytes, 289

M

Membrane proteins: isolation and characterisation of peptides derived from cleavage of the cytoplasmic domain of synaptophysin in frog brain, 187
Memory
behavioural impairment induced by calcitonin gene-related peptide antiserum in passive avoidance reflex in rats, 233
cholecystokinin prolongs 'unsaturated' θ-pulse induced long-term potentiation in rat hippocampal CA1, 421
effects of vasoactive intestinal peptide on scopolamine-induced amnesia in the rat, 153
Morphine
cholecystokinin receptor binding in morphine analgesia: tolerance withdrawal and abstinence, 379
differential effects of intrathecally injected galanin on antinociception induced by β-endorphin and morphine administered intracerebroventricularly in mice, 297
effects of μ- δ- and κ-agonists on isolated right atria of the rat, 365
investigation into the discriminative stimulus and reinforcing properties of the CCK_B-receptor antagonist L-365,260, 343
Muscle(s)
central administration of Tyr-MIF-1 stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and cholecystokinin receptors, 77
detection of immunoreactive substance P-like substances from cat brainstem sites during fatiguing isometric contractions, 319
effect of atrial natriuretic peptides on ion transport by muscle-stripped and full-thickness preparations of rat colon, 237
inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
neurotensin modulates cholinergic and noncholinergic neurotransmission in guinea-pig main bronchi in vitro, 159

N

Nerve growth factor (NGF) deprivation-induced neuronal cell death in rat sympathetic ganglion cells in vitro is suppressed by vasoactive intestinal peptide, 103
Neuroendocrine tumours: correspondence in patients with immunoassays for measurement of chromogranin A and pancreastatin-like immunoreactivity in humans, 201
Neurokinins/NK receptors
  effect of a NK-1 receptor antagonist on oedema formation induced by tachykinins carrageenin and an allergic response in guinea-pig skin, 405
  evidence for NK-2 receptors in guinea-pig airways from binding and functional studies using [^{125}I]-[Lys^5, Tyr(I$_2$)^7,MeLeu^9,Nle^{10}]-NKA(4-10), 1
  NK-1 and NK-2 receptors are similar in man and rabbit, 385
  synthesis and biological activity of NK-1 antagonists not containing D-residues, 55
Neuromedin U (NMU): effects of NMU-8 on the rat hypothalamo-pituitary-adrenal axis and evidence of a direct effect on the adrenal gland, 47
Neuropeptide Y (NPY)
  antagonist benextramine improves sexual behaviour in male rats, 355
  comparison of the NPY receptors mediating vasoconstriction of the guinea-pig uterine artery and thoracic vena cava using a range of NPY analogues, 21
  effect on release of neurotransmitter amino acids from rat striatum of, 65
  enhanced LHRH binding to rat gonadotrophs in primary culture by, 87
  enhanced proliferation of human colonic lamina propria lymphocytes by, 289
  role of α-1 adrenergic receptors in the stimulating effect of NPY on rat behavioural activity, 225
  role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland in situ, 391
  α-trinositol blocks NPY-induced inositol phosphate formation in cerebral vessels, 305
Neurotensin
  modulation of cholinergic and noncholinergic neurotransmission in guinea-pig main bronchi in vitro by, 159
  role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland in situ, 391
  structural requirements of bioactive peptides for interaction with endopeptidase 22.19, 281
Neurotoxin(s): capsaicin-like effect of resiniferatoxin in the rat stomach, 29
Nitric oxide
  nitroglycerin substitutes for endothelium-derived nitric oxide in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
  N_ω-nitro-L-arginine inhibits vasodilations and elevations of both cyclic AMP and cyclic GMP levels in rat aorta induced by calcitonin gene-related peptide, 123
  substance P induces biphasic endothelium-dependent relaxations in pig and rabbit carotid arteries, 329
Nitroglycerin substitutes for endothelium-derived nitric oxide in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
Noradrenaline: role of α-1 adrenergic receptors in the stimulating effect of neuropeptide Y on rat behavioural activity, 225

O

Oedema formation induced by tachykinins carrageenin and an allergic response in guinea-pig skin, effect of a neurokinin-1 receptor antagonist on, 405
Oestrogen-induced hyperprolactinaemia and lactotroph hyperplasia in the female rat, effect of the slow- release formulation of somatuline (BIM 23014) on, 399
Opioids
  binding characteristics of the novel highly selective delta agonist [^{3}]Ile^{5,6}Deltorphin II, 261
  cholecystokinin receptor binding in morphine analgesia: tolerance withdrawal and abstinence, 379
  differential effects of intrathecally injected galanin on antinociception induced by β-endorphin and morphine administered intracerebroventricularly in mice, 297
  dynorphin-A and vasopressin release in the rat, structure-activity study of, 371
  [^{3}H]dynorphin$_{1-8}$ binding sites in frog (*Rana esculenta*) brain membranes, 359
  effect of electroacupuncture tolerance by different frequencies on the opioid inhibition to cardiovascular activity in the spinal cord of rats, 221
  effects of μ- δ- and κ-agonists on isolated right atria of the rat, 365
  inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
  investigation into the discriminative stimulus and reinforcing properties of the CCK$_B$-receptor antagonist L-365,260, 343
  regulation of feeding by multiple opioid receptors in cingulate cortex: follow-up to an in vivo autoradiographic study, 207
  structural requirements of bioactive peptides for interaction with endopeptidase 22.19, 281
Oxytocin: role of central corticoliberin in the ether stress-induced secretion of neurohypophyseal hormones and corticosterone in the rat, 33

P

Pancreastatin (PST): immunoassays for measurement of chromogranin A and PST-like immunoreactivity in humans and correspondence in patients with neuroendocrine neoplasia, 201
Peptic ulcers: capsaicin-like effect of resiniferatoxin in the rat stomach, 29
Peptide YY, effect on release of neurotransmitter amino acids from rat striatum of, 65
Periaqueductal grey
  detection of immunoreactive substance P-like substances from cat brainstem sites during fatiguing isometric contractions, 319
  distribution of gastrin-releasing peptide/bombesin-like immunoreactive cell bodies and fibres in the brainstem of the cat, 93
  effects of sequential removal of rats from a group cage and

of individual housing of rats on substance P cholecystokinin and somatostatin levels in the periaqueductal grey and limbic regions, 253
inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
Pituitary gland
calcitonin and CGRP gene expression in human nervous system tumours, 215
comparative ^{3}H-CCK-8S binding studies on CCK_B-type receptors in guinea-pig cortex and continuous cell lines, 429
neuropeptide Y enhances LHRH binding to rat gonadotrophs in primary culture, 87
oestrogen-induced hyperprolactinaemia and lactotroph hyperplasia in the female rat, effect of the slow-release formulation of somatuline (BIM 23014) on, 399
Proglumide: effect of tryptophan and other serotonergic agents on brain CCK-8 concentrations, 59
Prolactin: effect of slow-release formulation of somatuline (BIM 23014) on oestrogen-induced hyperprolactinaemia and lactotroph hyperplasia in the female rat, 399
Protein kinases: neuropeptide Y enhances LHRH binding to rat gonadotrophs in primary culture, 87

R

Rana species
[^{3}H]dynorphin$_{1-8}$ binding sites in *R. esculenta* brain membranes, 359
isolation and characterisation of peptides derived from the cleavage of the cytoplasmic domain of synaptophysin in *R. ridibunda* brain, 187
Renin-angiotensin system: effects of central angiotensin II and angiotensin III on baroreflex regulation, 175
Resiniferatoxin, capsaicin-like effect in the rat stomach of, 29

S

Serotonin *see* 5-Hydroxytryptamine
Sexual behaviour in male rats is improved by neuropeptide Y antagonist benextramine, 355
Sigma receptors: involvement in Tyr-MIF-1-stimulated gastrointestinal motility in rats, 77
Skin: effect of a neurokinin-1 receptor antagonist on oedema formation induced by tachykinins carrageenin and an allergic response in the guinea-pig, 405
Sodium chlorate inhibition of pro-cholecystokinin sulfation alters its processing and decreases cellular content and secretion of CCK, 195
Somatostatin (SS)
effect of sequential removal of rats from a group cage and of individual housing of rats on substance P cholecystokinin and SS levels in the periaqueductal grey and limbic regions, 253
effect of slow-release formulation of somatuline (BIM 23014) on oestrogen-induced hyperprolactinaemia and lactotroph hyperplasia in the female rat, 399
Spinal cord
differential effects of intrathecally injected galanin on antinociception induced by β-endorphin and morphine administered intracerebroventricularly in mice, 297
effect of electroacupuncture tolerance by different frequencies on the opioid inhibition to cardiovascular activity in the spinal cord of rats, 221
evidence for localized release of substance P within rat spinal cord evoked by physiological and electrical stimuli: the antibody microprobe technique, 413
Stomach
capsaicin-like effect of resiniferatoxin in the rat, 29
central administration of Tyr-MIF-1 stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and cholecystokinin receptors, 77
Stress
depolarization-induced release of corticotropin-releasing factor in primary neuronal cultures of amygdala, 113
effects of sequential removal of rats from a group cage and of individual housing of rats on substance P cholecystokinin and somatostatin levels in the periaqueductal grey and limbic regions, 253
role of central corticoliberin in the ether stress-induced secretion of neurohypophyseal hormones and corticosterone in the rat, 33
Striatum
brain CCK-8 concentrations: effect of tryptophan and other serotonergic agents, 59
effect of neuropeptides on release of neurotransmitter amino acids from, 65
Substance P (SP)
biphasic endothelium-dependent relaxations in pig and rabbit carotid arteries induced by, 329
brain SP concentrations: effect of tryptophan and other serotonergic agents, 59
detection of immunoreactive SP-like substances from cat brainstem sites during fatiguing isometric contractions, 319
effect of a neurokinin-1 receptor antagonist on oedema formation induced by tachykinins carrageenin and an allergic response in guinea-pig skin, 405
effects of sequential removal of rats from a group cage and of individual housing of rats on SP cholecystokinin and somatostatin levels in the periaqueductal grey and limbic regions, 253
evidence for localized release of SP within rat spinal cord evoked by physiological and electrical stimuli: the antibody microprobe technique, 413
role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland, 391
Superior cervical ganglion: vasoactive intestinal peptide suppresses neuronal cell death induced by nerve growth factor deprivation in rat sympathetic ganglion cells in vitro, 103
Synaptophysin in frog brain, isolation and characterisation of peptides derived from cleavage of the cytoplasmic domain of, 187

T

Tachykinins *see* Neurokinins; Substance P
Thyroid gland: calcitonin and CGRP gene expression in human nervous and medullary thyroid carcinoma tissues, 215
Thyrotropin-releasing hormone (TRH): stimulation of locomotion in neonate rats by TRH analogue CG3703, 71
α-Trinositol blocks neuropeptide Y-induced inositol phosphate formation in cerebral vessels, 305

Trout: mode of action of calcitonin gene-related peptide in gill membranes and evidence for a GTP coupling process, 267
Tryptophan, effect on brain CCK-8 concentrations of, 59
Tumours *see* Cancer
Tyr-MIF-1 (Tyr-Pro-Leu-Gly-NH2) stimulates gastrointestinal motility in rats: evidence for the involvement of dopamine sigma and cholecystokinin receptors, 77
Tyrosine sulfation of pro-cholecystokinin: inhibition by sodium chlorate treatment alters its processing and decreases cellular content and secretion of CCK, 195

U

Ulceration, peptic: capsaicin-like effect of resiniferatoxin in the rat stomach, 29

V

Vagus nerve: subdiaphragmatic vagotomy does not prevent the anti-exploratory effect of caerulein in the elevated plus-maze, 39
Vascular system
comparison of the NPY receptors mediating vasoconstriction of the guinea-pig uterine artery and thoracic vena cava using a range of NPY analogues, 21
dexamethasone down-regulates endothelin receptors in human cerebromicrovascular endothelial cells, 145
effect of central angiotensin II and angiotensin III on baroreflex regulation, 175
effect of electroacupuncture tolerance by different frequencies on the opioid inhibition to cardiovascular activity in the spinal cord of rats, 221
effect of a neurokinin-1 receptor antagonist on oedema formation induced by tachykinins carrageenin and an allergic response in guinea-pig skin, 405
in vitro expression of CGRP in human endothelial cells transfected with plasmid and retroviral vectors, 167
inhibition in the release of immunoreactive β-endorphin from the periaqueductal grey during isometric contractions of cat hind-limb muscles: the effects of clonidine, 11
neurokinin NK-1 and NK-2 receptors are similar in man and rabbit, 385
nitroglycerin substitutes for endothelium-derived nitric oxide in potentiating vasorelaxations and cyclic AMP elevations induced by CGRP in rat aorta, 133
N_{ω}-nitro-L-arginine inhibits vasodilations and elevations of both cyclic AMP and cyclic GMP levels in rat aorta induced by calcitonin gene-related peptide, 123
substance P induces biphasic endothelium-dependent relaxations in pig and rabbit carotid arteries, 329
α-trinositol blocks neuropeptide Y-induced inositol phosphate formation in cerebral vessels, 305
Vasoactive intestinal peptide (VIP)
effects of VIP on scopolamine-induced amnesia in the rat, 153
role of neuropeptides in the regulation of adrenal zona fasciculata/reticularis function: effects on corticosterone secretion in the intact perfused rat adrenal gland, 391
suppression of neuronal cell death induced by nerve growth factor deprivation in rat sympathetic ganglion cells in vitro by, 103
Vasopressin
dynorphin-A and vasopressin release in the rat, structure-activity study of, 371
role of central corticoliberin in the ether stress-induced secretion of neurohypophyseal hormones and corticosterone in the rat, 33
Ventrolateral medulla: detection of immunoreactive substance P-like substances from cat brainstem sites during fatiguing isometric contractions, 319

X

Xenopus laevis, identification of a novel endothelin receptor in liver of, 181
